Subject: Submission of Project Proposal to achieve Open Defecation Free status of slipped back NGP awarded Gram Panchayat under IDF-OI

Reference: Joint Secretary, MDWS letter no. S-18012/38/2015-SBM dated 11th August, 2015

Sir,

In the reference of the letter of Joint Secretary (Swachh Bharat Mission), Ministry of Drinking Water and Sanitation, Government of India; I am hereby directed to submit project proposal for providing funding support in achievement of Open Defecation Free (ODF) status of slipped back Nirmal Gram Puraskar (NGP) awardees Gram Panchayats under Indian Development Foundation of Overseas Indians (IDF-OI) amounting Rs. 14.17 crores.

You are requested to support the project towards achieving the goal of 'Swachh Bihar'.
Encl: As above

Yours' faithfully,

(Birendra Kumar)
Chief Engineer (Urban)

Date: 12-10-2015

Memo. - 1133

Copy to:

1. Sri Saraswati Prasad, Joint Secretary, Ministry of Drinking Water and Sanitation, New Delhi for information and needful.
2. Sri Nipun Vinayak, Deputy Secretary, Ministry of Drinking Water and Sanitation, New Delhi for information and needful.

(Birendra Kumar)
Chief Engineer (Urban)

Public Health Engineering Department Government of Bihar

Project Proposal to achieve Open Defecation Free status of slipped back Nirmal Gram Puraskar awarded Gram Panchayats

- a) **Project Title:** MISSION MARYADA (Community initiative to resurgence of slipped back NGP)
- b) **Aim of the Project:** To trigger and mobilize community of Nirmal Gram Puraskar awarded Gram Panchayats for regaining the ODF pride and ensure sustainable behaviour on sanitation.

c) **Short Justification for the Project:**

To generate awareness on sanitation, the Nirmal Gram Puraskar (NGP) was awarded to recognise the achievements and efforts made at the GP level in ensuring full sanitation coverage and achieving the objectives and indicators of open defecation free GPs. Bihar has bagged 218 NGP so far and also been awarded with one block as "Nirmal Block" in the course of implementation. As per the guidelines of Nirmal Bharat Abhiyan, the maintenance and sustainability status of these NGP Gram panchayats is the responsibility of Gram Panchayats; but due to less community participation and understanding by the Panchayati Raj Institution, the awardees Gram Panchayats has got slipped back from the Nirmal status.

To accelerate the efforts to achieve universal sanitation coverage and to put focus on sanitation, the Swachh Bharat Mission (Gramin) [SBM(G)] has been launched on 2nd October, 2014 by restructuring Nirmal Bharat Abhiyan. The Mission aims to achieve Swachh Bharat by 2019, as a fitting tribute to the 150th Birth Anniversary of Mahatma Gandhi, which in rural areas shall mean improving the levels of cleanliness in rural areas through Solid and Liquid Waste Management activities and making Gram Panchayats Open Defecation Free (ODF), clean and sanitised. The Mission shall strive for this by removing the bottlenecks that were hindering the progress, including partial funding for Individual Household Latrines from MNREGS, and focusing on critical issues affecting outcomes. But the present guidelines of SBM(G) doesn't allow state to benefit NGP awardee community and this is causing a big hurdle to achieve target of "Swachh" within provided time-frame.

Since the focus of SBM(G) has been shift from toilet construction to collective behaviour change towards ODF community, so there is the need to adopt inclusive approach of triggering community with universal approach for sustainable behaviour. In this context Community Led Total Sanitation (CLTS) has been emerged as the key strategy to mobilize community to adopt safe and sustainable sanitation behaviour instead of constructing toilets. Also the budgetary provision of IEC & CB activities implementation is directly linked with the construction of toilet i.e. 5% of hardware cost (construction of IHHL, CSC & SLWM).

In context of Bihar Government has already made a huge investment to cover the excluded APL community under SBM(G) through State Specific Lohiya Swachhatta Yojana. But, the allocation of separate money for the slipped back Gram Panchayats remains a challenge for the State.

So, it is proposed to explore external assistance from various development actors towards mobilization of NGP awarded communities for regaining the ODF status through triggering and capacity building process.

- d) **Whether existing or new project:** New Project
- e) **Sector:** Rural Sanitation
- f) **Implementation agency and NGOs associated:** Bihar State Water and Sanitation Mission through District Water and Sanitation Committee

g) **Target Geographic location (village, district, etc.):**

State	District	Gram Panchayat	Target Household
Bihar	32	218	

h) **Design of Project:**

Broadly five major stages were identified as intensive process inputs to support the Gram Panchayats in re-gaining Open Defecation Free status. The stages include:

1. ODF status survey of Gram Panchayats
2. Capacity building of key stakeholders
3. Community mobilisation
4. Support to Community on Supply chain management for supporting toilet construction
5. Sustaining the ODF Achievements

These key stages have been grouped under three phases: Planning, Implementation and Sustainability.

Key features of the implementation design

- Each district prepares a detailed action plan outlining various activities, timelines and resources
- Nirmal Gram Panchayats are selected for focussed intervention and are supported to achieve Open Defecation Free (ODF) status for each Tola/ habitation located within the GP through saturation approach
- Maintenance of dysfunctional toilets through community collective & triggering process and mobilization of newly emerged HH for construction & usage of toilet
- Institutional sanitation coverage along with habitation/ GP coverage in identified NGPs.

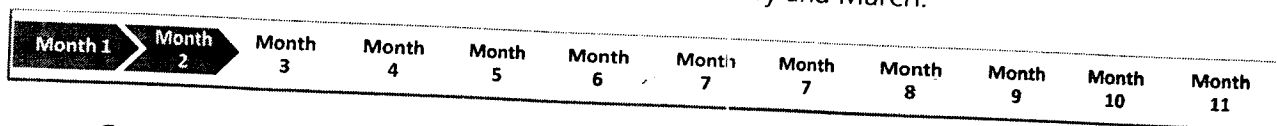

Planning

Action Plan

Planning is the most critical phase of the roadmap. During this phase, each district will develop a district specific plan as per the attached template (Annexure 1). The DWSC will lead the preparation of Action Plan under the guidance of BSWSM. The DWSC will identify various activities under Information, education and communication, services of resources agencies engaging Swachhata Preraks, capacity building interventions, No of GPs/ habitations to be supported to become open defecation free, no of new household and institutional toilets to be constructed. The

team will estimate the requirement of resources both in terms of human and financial to successfully achieve the target.

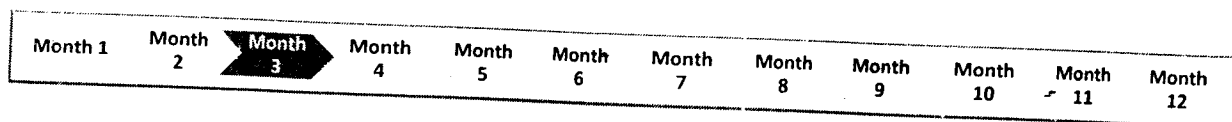

Action plans shall be deliberated upon and endorsed by the District Water and Sanitation Committee. The district shall share the draft plan with BSWSM and appraisal and concurrence. During the project period, planning for subsequent period shall be usually completed in the months of February and March.

Capacity building

The key activities under capacity building will focus on the district preparing itself for the implementation.

The DWSC shall engage human resources (e. g. *Swachhata Preraks*) as resource agencies to undertake community mobilisation, implement various IEC activities and training / orientation of stakeholders at various levels. Once these agencies/ human resources are on board, the DWSC shall organise orientation/ training of the deployed human resource to prepare the team for effectively undertaking intended function. Orientation workshops shall be arranged for all block level functionaries – Block Coordinators and district level functionaries from other departments such as Education, Social Welfare, Panchayati Raj and Rural Development. Subsequently, orientation workshops shall be organised for GP level functionaries- PRI leaders, GP Technical Assistant, ASHA, ANM, Anganwadi Workers & Teachers, and key opinion leaders. The capacity building of the team shall usually be completed within the third month.

Implementation

Once the resource pool is ready, the DWSC shall focus on systematically implementing the plan. All efforts shall be made to achieve the targets set out in the Action Plan within planned timeframe. Various activities to be undertaken during implementation phase have been grouped under 1) Mass Awareness, 2) Community Mobilisation and 3) Supply Chain Management. These are described in detail in following section. Implementation phase should ideally last not more than six months in identified Nirmal Gram Panchayat. The districts teams shall take targeted GPs in a phased manner. The entire cycle – starting from community mobilisation to achieving ODF status shall require about six months in each village.

Community Mobilisation

In order to eliminate the practice of Open Defecation, communities have to be supported *Tola* wise. The district and block teams will play the role of facilitator. Community Led Total Sanitation (CLTS) will be adopted to mobilise communities for collective behaviour change to achieve Open Defecation Free (ODF) status. The resolve of the community and demand shall be captured in a village specific Open Defecation Elimination Plan (ODEP). The communities demonstrating improved sanitation behaviours are facilitated to construct household sanitation facilities. The community mobilisation shall be taken up habitation wise. It may require about a month to undertake various mobilisation activities including CLTS triggering. These are detailed in the following section.

Triggering Behaviour Change

Community mobilization shall be undertaken jointly by District Coordinator/ Block Coordinator and *Swachhata Preraks* with the support of PRI members. Following are the key steps to undertake community mobilization with focus on community led total sanitation approach:

Pre-triggering: The team shall undertake village/ habitation visits to build rapport with the community, identify local influential leaders; undertake informal discussions to understand the community. Agree on the date for community meeting; identify venue for triggering

Triggering: On the agreed date, organise a CLTS triggering session. Invite community members for a group session at previously agreed venue. Conduct triggering session¹ using Participatory Learning and Action (PLA) tools to promote adoption of improved sanitation behaviours. In communities, where triggering is successful, form community based '*Nigarani Samitees*' to undertake self-monitoring. The pre-triggering and triggering activities shall be completed within first month of intervention in a given village.

Month 1	Month 2	Month 3	Month 4	Month 5	Month 6
---------	---------	---------	---------	---------	---------

Follow-up: Most responsive communities demonstrate adoption of improved sanitation behaviour, which may range from adoption of cat method (covering excreta with soil) to building simple no cost or low cost toilets. The improvements in the behaviours are monitored by the community members themselves through early morning follow-ups by '*Nigarani Samitee*' members. The defaulters are gradually persuaded to adopt improved behaviour. The follow-up is intense and rigorous

¹ In triggering sessions, external facilitator initiates a didactic dialogue with the community to help them analyse their sanitation and hygiene situation. The community collective is led to realize health risks caused due to unsafe disposal of their feces; and an agreement is reached to adopt improved behaviour through consensus.

process involving day-to-day contact with the community members, trying to understand their challenges, persuading and motivating and helping in building and using the sanitation facilities.

The communities, where triggering was successful, shall be mobilized to repair/construct dysfunctional toilets and construct new toilet on their own resources.

The communities demonstrating adoption of improved sanitation practices shall be mobilized to construct household latrines. The support required by the communities will be in the form of: 1) facilitating linkage with suppliers for procuring construction materials, 2) developing a pool of trained masons, and 3) construction of household latrines.

Financing

Revolving Fund

The project would have a provision to advance revolving fund as interest free loan for establishing a "Panchayat Swachhatta Kosh". The Panchayat Swachhatta Kosh can be opened and operated by Gram Panchayat. Under this fund may also be given to cooperative societies or self-help groups, whose creditworthiness is established, for providing cheap loan to their members. Families not able to construct toilet at time can also access the revolving fund as the interest free loan. The GPs can utilise these funds to support the households in building household latrine. In this case, the beneficiaries have to pay back the amount expended towards purchase of materials and payment of skilled labourers (e.g. mason) to the Gram Panchayat.

Construction of Household Latrines

Multiple mechanisms would be adopted to organise community for construction of household latrines or repairing of dysfunctional toilets. Household latrine construction shall be completed within a span of 4 months in a habitation/ Tola/ village. The activity shall be taken up in saturation mode.

Skilled/ Unskilled Labour:

Skilled masons are a key to quality construction of the latrine. Soon after community mobilization processes, the district team shall organise training of masons. As far as possible, the masons shall be resident of the same Gram Panchayat. A database of trained masons, including their contact details shall be maintained at the block and district level.

Sustainability

Sustaining the gains is extremely important. In the past, it has been observed that many communities have not been able to sustain the Open Defecation Free status. To avoid such slippages, sustained efforts will be required from all stakeholders. Field level functionaries – School teachers, ASHA, Arjanwadi workers, ANM, Swachhata Preraks, PRI members, Self Help Group (SHG) members and opinion leaders – will play a critical role in supporting the communities in sustaining the gains. They are regularly in contact with various sections of the community at variety of platforms. Support of these functionaries shall be taken to convey the messages on sustainable use of sanitation facilities by all members of the community. The *Nigarani Committee* formed during the CLTS triggering session plays an important role in sustaining the ODF status through early morning follow-ups.

i) **Expected outcomes/benefits proposed**

- Regaining the ODF status of all 218 NGPs.
- Communities adopting safe hygiene and behaviour practices

j) **Project timeline (date of commencement and completion):** 12 months

k) **Estimated Budget:**

Sl.	Particular	Unit Cost (Rs. in lakhs)
1.	District CLTS ToT	Rs. 0.50
2.	Incentive to Swachhatta Prerak (4 per GP)	Rs. 2.40
3.	Mason Training	Rs. 0.50
4.	Poster/Mass Communication activities	Rs. 0.50
5.	Panchayat Swachhatta Kosh	Rs. 2.50
6.	Contingency	Rs. 0.10
Total (per Gram Panchayat)		Rs. 6.50
Estimated Budget for all 218 NGPs		Rs. 1417.00

l) **Whether the cost includes capital cost as well as maintenance cost:** No capital cost

Report Printed on 31/8/2015 10:57 AM

S-18012/38/2015-SBM
Government of India
Ministry of Drinking Water & Sanitation

4th floor, Paryavaran Bhawan,
C.G.O Complex, Lodhi Road,
New Delhi- 110 003
Dated the 11th August, 2015

To

The Principal Secretary / Secretary in-charge of Rural Sanitation,
All States / UTs.

Sub: Engaging of overseas Indians in Swachh Bharat Mission (Gramin) -- reg..

Ministry of Overseas Indian Affairs have expressed willingness to engage Overseas Indians in Swachh Bharat Mission (Gramin) upon the request of the Ministry of Drinking Water & Sanitation. For this, they have set up India Development Foundation of Overseas Indians (IDF-OI) as a not-for-profit trust to receive donations and contributions by Non-Resident Indians and Persons of Indian Origin to various development projects, including projects under the sanitation sector.

2. Many of the districts in your State are doing exemplary work in sanitation and have targeted to make their entire district Open Defection Free (ODF) in a short time. In doing so, they may be facing some constraints of funds for specific tasks such as capacity building, trainings for behavioural change, funds for community toilets, funds for defunct toilets, documentation of best practices, monitoring and evaluation, R&D, higher fund requirement in difficult areas where only costly technologies are feasible, etc. Such projects may be passed on for funding to IDF-OI through Ministry of Overseas Indian Affairs.

3. It is, therefore, requested that a maximum of three projects from your State may be sent in the proforma attached herewith so as to reach this Ministry latest by 28th August, 2015.

Yours faithfully,

(Saraswati Prasad)
Joint Secretary

Project Template for submission of projects, by State Governments, to IDF-OI

- a) Project Title
- b) Aim of the Project
- c) Short justification for the project
- d) Whether existing or new project
