

Project Template for submission of project, by State Governments, to IDF-OI

- a) Project Title: Reconstruction of defunct / non-existent IHHL (Individual Household Latrine) for the beneficiaries in the District.

- b) Aim of the Project: To make the district true and sustained ODF through installation of IHHL to the households where the earlier installed subsidized IHHLs are found non-existing or defunct and cannot be entitled for Govt. subsidy again under the guideline of SBM(G)/MNB.

- c) Short justification for the project: As the triggered result of successful implementation of CLTS (Community Led Total Sanitation) approach in intensive and phase wise in the district, Community people are collectively seeking towards making their habitation ODF. Hence demand for installation of IHHL along with its usages achieved a sudden acceleration in the district. In respect to the BLS-2012, measurable no of GPs are being saturated on the aspect of installation of IHHL. But a reasonable numbers of Individual Households who have ever installed IHHL by receiving Govt. subsidy at early stages of implementation of NBA/TSC are now found with non-existed or defunct IHHLs.

So, though they seek to be included with the group of the regular toilet users but they are not being able to install IHHL from their own. Prevailing guideline of SBM(G) does not permit also to render Govt. subsidy for 2nd time irrespective of the subsidy amount they have received earlier.

This occurring as a challenging constrain for the district towards becoming 100% ODF.

So installation of IHHL to the Households where it is presently found non-existing or is in defunct condition is the immediate need towards making the district true and sustained ODF.

- d) Whether existing or new project : New

- e) Sector : Sanitation

- f) Implementing agency and NGOs associated : Panchayat Samities & Rural Sanitary Mats engaged under MNB for the district.

- g) Target beneficiaries – number and nature (eg women, children, tribal etc.) : Total 89800 no of households in the district Birbhum under BPL/Restricted APL category who have ever installed IHHL with help of the Govt. subsidy, but those are either defunct or non-existing and the said households are non-capable of installation of the same from their end.

- h) Target geographic location (village, district etc.): Total 2245 Gram Sangsads of the District Birbhum in 167 Gram Panchayats.

- i) Design of project (methodology, intervention etc.): Identification of the targeted households through one to one physical verification is already being made by the Asha karmies, Anganwari workers etc in the entire district.

Prioritizing the list of beneficiaries for the selective GPs where CLTS approach have intensively been applied and already became saturated in terms of Installation of IHHL as per the BLS-2012.

Afterwards, replicating the same for the rest GPs in the district based on the demand generated towards it's usage from the community.

- j) Expected outcomes / benefits proposed: Each and every individual household in the district will have a operating toilet with its 100% use that will contributes towards achieving ODF status for the District in its truest sense.
- k) Project timeline (Date of Commencement and completion): Six month from the date of commencement.
- l) Estimated budget: Rs. 12,000/- each x 89800 households = 107 crore and 76 lakhs only
- m) Whether the cost includes capital cost as well as maintenance cost: Yes
- n) Images of proposed project (if any)
